EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul A. Fournier on 22 December 2006.

The application has been amended as follows:

In claim 5, line 3, replace "via the" with --via a--.

In claim 6, line 3, replace "information of said X-ray" with --information of an X-ray--.

In claim 6, line 8, delete "and".

In claim 6, line 11, replace the period with a semicolon.

In claim 6, insert at the end of the claim --and a focus adjusting step at which referring to images presented at said presentation step, a focus lens of said X-ray tube is adjusted in such a way that a focal diameter of the electron beam at a target of said X-ray tube becomes a desired state.--.

In claim 7, line 4, insert --and-- at the end of the line.

In claim 7, line 7, replace "; and" with a period.

In claim 7, delete lines 8-10.

REASONS FOR ALLOWANCE

2. Claims 5-7, 11, 15, 19 and 23 are allowed.

The following is an examiner's statement of reasons for allowance.

With respect to claim 6, the prior art fails to teach or fairly suggest an X-ray tube adjusting method including an imaging step at which an X-ray inspection apparatus images a test image of a subject to be imaged at a time parts of an X-ray tube are replaced and a presentation step at which an initial image associated with identification information of said X-ray tube is acquired from a storage means and presented in such a manner as to be comparable with a test image, in combination with all the claim limitations. Claims 5, 7, 11, 15, 19 and 23 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

National Electrical Manufacturers Association Standards Publication No. XR 5-1992 (R1999), "Measurement of Dimensions and Properties of Focal Spots of Diagnostic X-Ray Tubes", discloses standard term definitions and test methods for determining properties of focal spots of x-ray tubes (entire document).
